# AN ANCIENT EPIGRAM

DR. TALMAGE FOUNDS HIS SERMON ON AN OLD SAYING.

He Uses It to Illustrate the Ludicrous Behavior of These Who Magnify Small Sins and Ignore Great Ones. Much In Little.

[Copyright, Louis Klopsch, 1899.] WASHINGTON, July 16 .- In this discourse, founded on an ancient epigram repeated by Christ, Dr. Talmage Illustrates the felly of being very parwhile neglectful of vast concerns. The text is Matthew xxiii, 24: "Ye blind guides, which strain at a gnat and swallow a camel."

A proverb is compact wisdom, knowledge in chunks, a library in a sentence, the electricity of many clouds discharged in one bolt, a river put through a mill race. When Christ quotes the proverb of the text, he means to set forth the ludierous behavior of those who make a great bluster about small sins and have no appreciation of great ones. In my text a small insect and a large quadruped are brought into comparison-a gnat and a camel. You have in museum or on the desert seen the latter, a great awkward, sprawling creature. with back two stories high and stomach baying a collection of reservoirs for desert travel, an animal forbidden to the Jews as food and in many literatures entitied "the ship of the desert." The gnat spoken of in the text is in the grub form. It is born in pool or pond, after a few weeks becomes becomes the gnat as we recognize it. in its very smallest shape, and it yet | we find in the text. inhabits the water, for my text is a misprint and ought to read "strain out

CONSULS' GOOD WORK

AID RENDERED IN PROMOTING COM-MERCE ABROAD.

What the State Department Requires of Its Representatives-How a Western Senator Got Even-Amzi Smith's Wonderful Memory.

WASHINGTON, July 17. The attention which one bureau of the state department is giving to methods for promoting our commerce abroad is having a good effect. Business men and manufacturers seeking a market for their products read the consular reports regularly to ascertain what is offered in the way of a foreign market. Consuls are instructed to send to the state department all information of this charneter that can be obtained. Some of them are very industrious and report not only what opportunities there are for the sale of American made goods. but furnish a great deal of information as to what foreign countries are doing in the way of exports. The method in which foreign countries promote their trade either in colonies or in sections where manufacturing is not carried on to any great extent is fully set forth by those consuls who give close attention to the instructions of the department.

When a line of trade in this country desires information, a request is made at the state department that consular officers be directed to furnish it and results in reports covering that partieular subject. These directions are not given by the state department unless the line of trade and the possibilities of a big export business following are sufficient to warrant the making of a special order for the purpose of ascertaining the information. Wide publication is given to all reports upon commerce and advice of consuls as to the best way to promote the sale of Ameri-

can products. A story is told of a senator representing one of the western states which if true illustrates to what length some men will go to accomplish a purpose upon which they set their minds. A number of years back this senator, then a very young man, was employed in one of the government departments in Washington, having been appointed from a central state. He was placed under a chief of division who thought more of the subservience of his subordinates than of the expeditious conduct of official business. This trait soon made the chief unpopular with those under him, including the young man destined to occupy a seat in the United States senate.
